

Storm Solutions

Advanced wind mitigation systems for commercial and residential protection

"The Northeast is staring down the barrel of a gun... The Northeast coast is long overdue for a powerful hurricane, and with the weather patterns and hydrology we're seeing in the oceans, the likelihood of a major hurricane making landfall in the Northeast is not a ques-

Storm Solutions™, Inc. is a Connecticut-based corporation providing innovative and aesthetically appealing storm and wind mitigation solutions to the commercial and residential markets of New Jersey, New York, Connecticut, Rhode Island, and Massachusetts.

Increasingly, stringent building codes and insurance regulations in the Northeastern United States are generating significant demand for hurricane, storm and wind mitigation protection.

Storm Solutions™ provides a range of products designed to meet the most demanding specifications, including the highest-rated flexible and rigid screens and shutters in the industry. Storm Solutions™ has re-engineered these systems to meet the unique needs and aesthetics of Northeastern architecture and salt air conditions.

Due to the increased occurrence of major storms, many insurance carriers are dropping coastal customers or increasing rates dramatically. *Storm Solutions™ has teamed with insurance carriers to provide advanced wind mitigation solutions to help reduce costs and lower deductibles.*

Storm Solutions'™ CSI (Certified Sales and Installation) Agents are commercial and residential contractors that have completed a thorough training & installation course designed by the nation's top expert in hurricane, wind and storm protection. A commitment to superior quality workmanship and deployment techniques enables CSI Agents to provide the most advanced storm mitigation solutions.

Armor Screen®

The original, patented fabric hurricane protection system provides Miami-Dade approved protection with a transparent screen allowing for vision outside of the home. At 1/10th the weight of rigid products, Armor Screen is accessible, easy to deploy and virtually maintenance free.

StormWatch

Reinforced non-porous material combines superior protection with ease of deployment. The patent-pending anchor clips provide four times the strength of grommets and secure without unsightly tracks. Innovative UV cover protects systems and possessions from UV damage.

Wayne Dalton® Fabric Shield™ Storm Panels

Economical, easy to store PVC coated fabric panels block wind, rain and debris.

Coastal Shutter Systems

Colonial Shutters provide a permanent solution that is in keeping with many architectural styles found in the Northeast. Reinforced storm bars store behind the shutters, making the systems easy to close and secure.

Transparent Protection Systems

Miami-Dade rated ClearGuard® Hurricane Panels are 100% translucent, Polycarbonate/Lexan material. ValueGuard® Hurricane Panels are coastal rated and priced to compete with aluminum and steel panels. Opaque design allows 45% translucency.

Benefits of Utilization

With the majority of storm damage coming from wind driven rain, Storm Solutions™ systems provide superior protection of your home and valuables. Minimize the loss of use or loss of revenue from your home or business due to storm, wind, or water damage. SSI's innovative products are easy to store, deploy and remove. Receive significant premium reductions from most insurance carriers and a reduction and/or elimination of the deductible in case of loss (in many cases covering the total cost of Storm Solutions™ deployment).

Peace of Mind

Nothing can replace the loss of decades of memories established in a home or efforts invested into building a business.

Storm Solutions'™ line of advanced hurricane, storm, wind and rain mitigation products are engineered to protect homes and businesses, including those valuables contained within them.

Avoid losing the use of your home or business for seasons or even years as storm-related damage is repaired.
